Published on 08/28/11

Doremisoft has announced Doremisoft Mac MOD Converter. It has been updated to fully support iPad 2 and Final Cut Pro X. Doremisoft Mac MOD Converter is one of the most powerful third app to easily convert JVC MOD, Canon MOD, Panasonic MOD files to Mac AVI, M4V, ASF, MPEG1, MPEG2, MPEG4, MOV, FLV, 3GP, 3G2, DIVX to 3GP, 3G2, MKV, MOV, MPEG1, MPEG2, MPEG4,M4V, FLV, SWF, DV and so on. Then we can do the best editing on Final Cut Pro X, Sync to iPad 2, iPad HD, iPhone 4 etc.

Tallahassee, Florida - Doremisoft has announced Doremisoft Mac MOD Converter. JVC Everio GZ-MS110BEK file format problem? "I have bought a JVC Everio GZ-MS110BEK camcorder (I'm in Europe, so it is PAL format camcorder). It is great except that I cannot do anything on iMovie 11 or Final Cut Pro X with the silly .mod videos it records." stated from Yahoo Answer.

This is a common question we meet when use JVC, Canon MOD cameras. SD MOD camera has won many consumers for its lower price than HD types and relatively high 1024*576 or 720*480 resolutions. After recording the MOD files we desire to edit these videos to Mac professional tool like iMovie'11 and Final Cut Pro X, but luckily the JVC or Canon hard disk camcorder are on the list of iMovie-compatible devices but for another powerful editor, Final Cut Pro X it is out of the question, Also it can't be imported to iTunes to sync to iPad 2, iPad HD, iPhone 4 or the iPhone 5 is preparing to release.
