Introducing Best Baby Monitor 1.0 for OS X, Special Memorial Day Promo

Published on 05/24/12

Independent app developer, Martin Man, announces today an immediate availability of Best Baby Monitor 1.0 for Mac OS X, the five star rated, reliable, and easy to use Video Baby Monitor app available already for iPhone, iPad, and iPod touch. Best Baby Monitor for Mac OS X 1.0 allows you to use your Mac as a parent unit device, keeping an eye on your little one while working during his naps, or to use your Mac as a child unit device, connecting to it over Wi-Fi from any of your iOS devices.

Prague, Czech Republic - "Best Baby Monitor for iOS has been receiving positive reviews on the AppStore since its launch in July 2011. We have been awarded the 3rd place on the Babble's Top 25 Travel Apps for Parents by the end of 2011. We are very proud to make Best Baby Monitor available from today also for Mac OS X computers." said Martin Man, the lead developer.

Best Baby Monitor makes it very easy to turn any of your two iOS devices into a reliable and fully featured video baby monitor. One device captures the live audio and video and sends it over Wi-Fi or Bluetooth to another iOS device. Easy to use, with real time audio and video streaming, and many practical features such as built in lullabies and ability to switch on the night vision mode, Best Baby Monitor is a leading product in its category.

Best Baby Monitor for Mac OS X 1.0 that we are introducing today allows you to use your Mac as a parent unit device, keeping an eye on your little one while working during his naps, or to use your Mac as a child unit device, connecting to it over Wi-Fi from any of your iOS devices.

Best Baby Monitor for Mac and iOS makes an ideal travel baby monitor. To celebrate the Memorial Day and launch of Best Baby Monitor 1.0 for Mac OS X we are making both products available for 50% off the regular price ($1.99 for the iOS version and $2.99 for the Mac version) from Friday May 25th until Tuesday May 29th.
