

Bitnotic Ships VX-323 for Real

Published on 11/04/07

Bitnotic today announced the immediate availability of VX-323 1.0, a MIDI-controlled voice synthesizer software instrument for Apple Macintosh computers. The software enables electronic musicians to easily integrate real-time synthesized speech into their MIDI studios for live performances or CD-quality recording.

FOR IMMEDIATE RELEASE

Portland, Oregon - November 1, 2007 - Bitnotic today announced the immediate availability of VX-323 1.0, a MIDI-controlled voice synthesizer software instrument for Apple Macintosh computers. The software enables electronic musicians to easily integrate real-time synthesized speech into their MIDI studios for live performances or CD-quality recording.

The product features:

- * Support for any Apple speech voice or licensed Cepstral voice
- * Real-time speech volume, pan, key velocity, and volume envelopes
- * Up to 32 keyboard splits (keymaps), each with their own voice, phrase, and audio settings
- * Phonetic phrase editor for precise editing of phonemes, pitch, and duration
- * Non-English language support using the phonetic phrase editor or Cepstral voices
- * Robust MIDI support for notes, controllers, and SysEx
- * AIFF recording at 22/44 Khz stereo/mono.
- * SoundFont 2 bank instrument export for Logic, GarageBand, and other software and hardware samplers
- * Racks for multiple speech synthesis modules
- * Customizable faceplate colors
- * and much more

Designer Scott Burgess exclaims, "VX-323 can perform an entire pop song or a single syllable. It can sound realistic or robotic. Like all musical instruments, there is depth and nuance, emotion and meaning in the VX-323. It is up to the musician to discover it."

Example songs created using VX-323 can be heard on Bitnotic's Web site. A VX-323 unit also has a MySpace page where he is trying to advance his recording career. The URL for that page is <http://www.myspace.com/vx323>.

Pricing and Availability:

The trial version of VX-323 1.0 can be downloaded for free from Bitnotic's Web site. The software runs on Mac OS X version 10.4 and is a Universal Binary application. There will be a Mac OS X 10.5 Leopard update for VX-323 soon.

Users can unlock the trial by purchasing VX-323 directly through the software or through the Bitnotic web site. The price is \$59.95 until January 1, 2008, when it will go up to \$79.95.
