

Robert Landis introduces SpotACop 1.0 for iPhone

Published on 01/21/10

Independent software developer Robert Landis is pleased to introduce SpotACop 1.0, his new cop and law enforcement locator for iPhone 3G and 3GS devices. Designed specifically to take advantage of the iPhone's unique capabilities and touch interface, SpotACop allows anyone to see where police officers are currently spotted by other drivers. To prevent from getting a speeding ticket, SpotACop also issues a warning to let drivers know to slow down before they approach one of these areas.

Baltimore, Ohio - Independent software developer Robert Landis is pleased to introduce SpotACop 1.0, his new cop and law enforcement locator for iPhone 3G and 3GS devices. Designed specifically to take advantage of the iPhone's unique capabilities and touch interface, SpotACop allows anyone to see where police officers are currently spotted by other drivers.

Featuring a comfortable and simple user interface, SpotACop serves uniquely as a socially networked radar detector. The more people who use it, the more efficient it will become. To prevent from getting a speeding ticket, SpotACop also issues a warning to let drivers know to slow down before they approach one of these areas.

Feature Highlights:

- * Comfortable and simple User Interface
- * Issues an alert to slow down in potential speed traps
- * See how long ago the cop was spotted

"I was compelled to develop SpotACop because honestly, I have a lead foot," said Robert Landis, developer of SpotACop. "I started the company because I thought there had to be a better way to notify people of a cop other than flashing your lights at them. Being young and ambitious drove me to try to create an app that I hope is useful and inexpensive."

Device Requirements:

- * iPhone, 3G and 3GS devices running 3.1.2 or later
- * 0.4 MB

Pricing and Availability:

SpotACop 1.0 is only \$0.99 (USD) and available worldwide exclusively through the App Store in the Navigation category. Review copies are available upon request.
