

## **Zevrix Updates Digital Delivery Solution File Courier - Improves E-mail**

Published on 01/21/10

Zevrix Solutions today announces File Courier 1.1, an update to its professional digital delivery solution with emphasis on needs of graphics industry professionals. File Courier delivers files and folders to FTP and local destinations and sends automatic e-mail delivery notifications. The software can also create a lo-res version of PDF file, compress items and protect deliveries with password. The new update implements a more robust, powerful e-mail engine and expands FTP options.

Toronto (ON), Canada - Zevrix Solutions today is pleased to announce File Courier 1.1, an update to its professional digital delivery solution with advanced time-saving options. File Courier delivers files and folders to FTP and local destinations with emphasis on needs of graphics industry professionals involved in prepress, printing, design and ad production.

File Courier provides the following professional digital delivery capabilities:

- \* Deliver files and folders to FTP and local destinations
- \* Automatic e-mail notifications based on variable templates
- \* Deliver files by e-mail
- \* Create lo-res PDF automatically and attach to e-mail
- \* Automatic zip and disk image compression
- \* Encrypt disk images with passwords
- \* Attach files from specific subfolder to e-mail
- \* Detailed history of all deliveries
- \* Destination codes for automatic delivery

File Courier also lets users test FTP locations to ensure the info is entered correctly and provides the detailed feedback on all processing stages. The new update implements a more robust, powerful e-mail engine which lets users enable SSL connection and provides detailed progress of e-mail transmission. The update also allows users to specify a custom FTP port.

Pricing and Availability:

File Courier 1.1 can be purchased from the Zevrix website for \$29.95 (USD), as well as from authorized resellers. Trial version is also available for download. File Courier is a Universal Binary and available for Mac OS X 10.4.2-10.6.
