

iWeb SEO Walkthrough Video - Learn How to Optimize your iWeb Website

Published on 01/22/10

RAGE Software announced today the immediate availability of their Step by Step iWeb SEO Instructional Video Tutorial. The iWeb SEO Video provides easy to follow steps to getting your iWeb site listed in search engines, attracting more search engine visitors and exposing your website to your target market. Combined with the free iWeb SEO Tool software, iWeb users can finally achieve the same, or better, search engine rankings that other websites have enjoyed for years.

Toronto, Ontario - RAGE Software announced today the immediate availability of their Step by Step iWeb SEO Instructional Video Tutorial. The iWeb SEO Video provides easy to follow steps to getting your iWeb site listed in search engines, attracting more search engine visitors and exposing your website to your target market. Combined with the free iWeb SEO Tool software, iWeb users can finally achieve the same, or better, search engine rankings that other websites have enjoyed for years.

The number one source of targeted new visitors to a website will come from the major search engines including Google, Yahoo and Bing. Since iWeb was meant for personal websites to share with just friends and family, many iWeb users have been left in the dark when it comes to ranking at the top of these search engine results. The iWeb SEO Video tutorial will walk iWeb users through the entire process of search engine optimization without all the technical jargon.

The iWeb SEO Video includes a walk through checklist for achieving the best search engine rankings, a bonus video explaining the top mistakes iWeb users are currently doing to hurt their search engine rankings and over 70 minutes of detailed instructions.

The iWeb SEO Video is the only complete resource for iWeb users wanting to learn more about search engine optimization. "There is even a fantastic clip showing how to add header tags to your sites really easily. I learnt things watching these videos and would highly recommend them to any iWeb user wanting to get their iWeb site higher up in the search engine rankings." said Tim Bowden of the popular iWeb tutorial site, All About iWeb.

For a limited time, the iWeb SEO Video includes 1 year of free web hosting to help move iWeb users away from MobileMe and over to more professional servers that can handle larger websites.
