

Touch Cams 1.0 released for iPhone and iPod Touch

Published on 01/30/10

Independent developer Pere Orra today announces Touch Cams 1.0 for iPhone and iPod touch devices. Touch Cams is a webcams viewer that lets you freely distribute the cams on as many screens you may need. Touch Cams does not include a cams directory, and instead lets you find webcams on the web with its integrated web browser with Google search. Touch Cams is handy for finding traffic patterns, travel, weather info, and more.

Mataro (Barcelona), Spain - Independent developer Pere Orra today is pleased to announce Touch Cams 1.0 for iPhone and iPod touch devices. Touch Cams is a webcams viewer that lets you freely distribute the cams on as many screens you may need. Touch Cams does not include a cams directory, and instead lets you find webcams on the web with its integrated web browser with Google search.

Key Features:

- * Move, Scale & Rotate cams with your fingers by dragging and pinching
- * Double tap cams to Zoom In, double tap again to Zoom Out
- * Place as many as you can in a single screen
- * Create as many screens as you need with different cams on each
- * Search for webcams with integrated browser with Google Search
- * Automatically retrieves all images in a site and show the latest modification, so you can easily find the image that is a webcam
- * Share webcams by email with other Touch Cams users that can install the shared webcam with a simple tap
- * Shared webcams can also be send to anyone, as the email contains always the latest image of the webcam
- * Allows to save a backup of all your cams by simply sending a email
- * Multiple update options: On Start, On Changing Screen, On Zoom In

Device Requirements:

iPhone and 2nd Generation iPod touch 3.0 or later
