Identify hazards from a list of 24, assigning probability and severity and risk assessment get it automatically. The audio and photo files are named after the job automatically evaluated. In the event that more than one file, it automatically numbered.

Valencia, Spain - Nasarre Consultores SL, Spanish company dedicated to the safety and health at work, has developed the first APP for workplace risk assessments. An APP intuitive, open, practical, no manual is not needed and can be used by anyone without expert knowledge of prevention of occupational hazards.

Feature Highlights:

- * Identify hazards from a list of 24 (the most used occupational risk prevention), assigning probability and severity and risk assessment get it automatically
- * Possibility to include as many hazards as identified
- * Carry a photograph and point out the unsafe conditions you want in the same image. You can choose from different colored arrows to get a better contrast with the background of the photo
- * Flesh out what security is provided that generates the risk
- * Assign appropriate precautionary measures
- * Record audio file with comments on the assessment
- * The audio and photo files are named after the job automatically evaluated. In the event that more than one file, it automatically numbered
- * Automatically send all information by mail and can handle it as we please, including decision tables
- * Includes help guides for decision making and warning of serious and imminent danger

Language: Spanish, In future versions be developed in English.

Price: 7.99 euros.
