

Cube Master 1.2 for iPhone Makes Rubik's Cube Mastery Possible

Published on 02/05/10

Kylinworks today released Cube Master 1.2 for iPhone and iPod Touch users. The app provides regular gameplay as well as step-by-step instruction and a tutorial for those interested in learning to master the often frustrating Rubik's Cube. The Cube Master interface offers hints that follow a user's moves, so successful completion of the puzzle is possible. The app can forecast plays based on where the puzzle is at that moment then guide the player forward.

Waretown, NJ - Announcing that Kylinworks, the developers of Cube Master, has released their latest update. The app provides regular gameplay as well as step-by-step instruction and a tutorial for those interested in learning to master the often frustrating Rubik's Cube. The Cube Master interface offers hints that follow a user's moves, so successful completion of the puzzle is possible.

Anyone who has ever played with a Rubik's Cube understands how frustrating it is to get one side of the cube right, only to have it come undone when fixing another side. At times, it seems impossible to solve. That's where Cube Master comes in. The Cube Master app uses a step-by-step process for follow-through on a move. A user merely has to ask for hints or consult the built-in tutorial to see what the next several moves should be. The app can forecast plays based on where the puzzle is at that moment then guide the player forward.

Cubes are displayed as transparent models, which enables a user to see all sides of the puzzle at once. This aids in the learning process, making it a little easier to understand how a turn of the cube affects another side. Cube Master has been designed with a practice area for users to perfect their cube solving play before starting a real game. The auto save feature ensures that they don't have to start all over again if they have to leave the app for any reason.

Features:

- * 3X3 cube
- * Touch and swipe to rotate slice of cube, touch and swipe outside of cube to rotate the whole cube
- * Tutorial included shows how to solve cube puzzle
- * Hint/tutorial on any status during play
- * Auto finishing as human thought
- * Transparent view model, lets you see back and sides without rotating the cube
- * Unlimited undo
- * Auto save

For anyone who wants to master a cube puzzle or even just beat the Rubik's Cube once, Cube Master is an app they should consider downloading. It cuts through the mystery and lends logic to this frustrating game. After fighting with it for so long, the victory will feel very sweet.

Device Requirements:

iPhone or iPod Touch 2.2.1 or later

Pricing and Availability:

Cube Master 1.2 is only \$0.99 (USD) and available worldwide exclusively through the App Store in the Games category. Promo codes are available for qualified reviewers. Please specify the website or blog you represent when making your request.
