

## Trunk Notes - An iPhone Personal Wiki and Advanced Note Taking App

Published on 02/06/10

UK based Apps On The Move today released Trunk Notes 2.1.0, a flexible personal wiki for the iPhone and iPod touch. Trunk Notes is the ideal mobile information system for both personal and business use. A powerful wiki engine enables notes to be quickly linked together creating a network of information. The latest version supports text, image and now voice wiki entries enabling users to capture more of their information in one place.

Birmingham, United Kingdom - Apps On The Move today is pleased to announce Trunk Notes 2.1.0, a flexible personal wiki for the iPhone and iPod touch. Trunk Notes is the ideal mobile information system for both personal and business use. The latest version supports text, image and now voice wiki entries enabling users to capture more of their information in one place.

"Personal Wiki technology turns an already powerful note taking app into the ultimate solution for users who need to manage lots of information on the go" said Matthew Kennard, the founder of Apps On The Move. "Trunk Notes is easy to get started with, but offers users who need it the power required to create an information system suited to their needs."

Comments from enthusiastic users include "what a game changing gem", "extremely powerful and flexible", "Trunk Notes must be one of the best kept secrets in the App Store" and "easy to get started, great power".

Trunk Notes is the ideal app for managing hundreds or even thousands of notes. A powerful wiki engine enables notes to be quickly linked together creating a network of information. Dynamic content allows users to set up Trunk Notes to display their most important and urgent information where and when required.

Trunk Notes makes use of the straightforward Markdown wiki syntax for formatting headings, lists and text. Users can get started with no prior knowledge due to handy toolbar buttons to quickly create headings and lists. Numbered and bullet lists work just like they do in a word processor with automatic list continuation and multiple levels of indentation.

Apps On The Move demonstrates how the iPhone and iPod touch can be turned into powerful information management tools. One of the core principles behind Apps On The Move is that users should be in total control of their data. A personal wiki created in Trunk Notes can be quickly exported and read in any text editor, data is kept under the control of the user. Apps On The Move continues to release updates with features designed in collaboration with an active community of users.

### Device Requirements:

- \* iPhone and iPod touch
- \* Requires iPhone OS 3.0 or later
- \* 0.8 MB

### Pricing and Availability:
