

Virtual TimeClock 5.6 Lets the Cat Out of the Bag!

Published on 11/16/07

Redcort Software today released Virtual TimeClock Pro 5.6, a feature packed Leopard compatible upgrade to their industry leading time and attendance software for Apple Macintosh and Microsoft Windows computers. Virtual TimeClock Pro is the powerful, easy to use, software based time and attendance program that enables businesses of any size to effortlessly track employee hours and overtime.

Fresno, CA - November 16, 2007 - Redcort Software today released Virtual TimeClock Pro 5.6, a feature packed Leopard compatible upgrade to their industry leading time and attendance software for Apple Macintosh and Microsoft Windows computers.

"The Virtual TimeClock Pro 5.6 release was engineered from day one for full Leopard compatibility," explained Keith DeLong, President of Redcort Software. "After thoroughly testing Virtual TimeClock 5.6 on Apple's retail release of OS X 10.5, we field tested our new release with over a hundred early adopters of Leopard." Redcort has performed compatibility tests on older versions of Virtual TimeClock Pro and the company does not recommend using them with Leopard.

The Virtual TimeClock Pro 5.6 release features a major upgrade to the built-in Timecard Report Writer. Already an easy to use, full-featured report generator for Virtual TimeClock, the new Report Writer has been enhanced by over a dozen new reporting capabilities. The streamlined new interface enables users to easily customize the signature line text for each report, sort timecards by first or last name, include Social Security or Employee ID numbers on reports, and even designate a specific printer and orientation for timecard reports.

Virtual TimeClock Pro 5.6 introduces an easy to use Paid Break option that simplifies monitoring and reporting paid employee breaks. The release also contains numerous enhancements that improve overall program reliability and usability.

Free Evaluation:

The fully functional Virtual TimeClock Pro program can be downloaded free for anytime from Redcort Software's web site at <http://redcort.com/download.html>. When Virtual TimeClock Pro is installed without a license key, the software runs for 300 entries without any restrictions. After the evaluation period, a software license and activation key must be purchased to continue using Virtual TimeClock Pro.

Upgrades:

Virtual TimeClock Pro 5.6 is a free upgrade for all users enrolled in Redcort Software's Maintenance & Support program. Upgrade pricing is available from Redcort Software for all other users. Step by step program upgrade instructions for any prior version of Virtual TimeClock are available on the Redcort Software web site at <http://redcort.com/upgrade.html>.

About Virtual TimeClock:
