

## **XChange Announce Release of Exportools Pro for QuarkXPress**

Published on 11/18/07

XChange International, the source for extended technology worldwide, are pleased to announce the release of Exportools Professional 2, the multi-page QuarkXPress document exporter utility. Exportools Professional is the powerful new version of Exportools that lets users batch output as single-page files any number of QuarkXPress documents.

XChange International, the source for extended technology worldwide, are pleased to announce the release of Exportools Professional 2, the multi-page QuarkXPress document exporter utility. Exportools Professional is the powerful new version of Exportools that lets users batch output as single-page files any number of QuarkXPress documents. With its unique naming capabilities and intuitive design, Exportools Professional can generate hundreds of EPS, PostScript, PDF, JPEG or text files in a matter of minutes.

Whether it's just one document or a thousand documents, Exportools Professional quickly exports each document page as a separate file. The smart name composition engine allows users to specify variable placeholders, such as page or serial numbers, that change automatically to name each exported file as required. To organise the files that belong to each exported document, Exportools Professional has the option to automatically create subfolders with variable names. The XTension can be configured to open each of the exported files with any application a user chooses and it keeps track of the 50 most recently accessed applications.

The interface includes many customisation options such as suppression of error messages, outputting as spreads, inclusion of all layouts for all documents, and more. Exportools Professional supports these output formats: EPS, PostScript, PDF, Text (plain, rich text, WordPerfect(R) or Microsoft Word(R)), JPEG, PICT, GIF, and HTML.

### System Requirements:

Exportools Professional 2.0 is Universal Binary and requires QuarkXPress 7 and Mac OS X Tiger (10.4.2 or later) or Leopard (10.5.x). There is also an existing Exportools for QuarkXPress 4, 5, 6 and 7, and Exportools for Adobe InDesign.

Exportools is available now through XChange International. To order, or for more information, users can visit XChange, or call on +44(0)20 7490 4455 during UK business hours.
