

MonitorMyMac Now Free to Help Parents Protect their Children Online

Published on 02/09/10

UK based Arten Science today announced that MonitorMyMac, their Macintosh software which gives Timed Screenshots and Webcam Images with FTP Upload, is now available free of charge

for all parents to help them keep their children safe online by monitoring their computer usage. MonitorMyMac takes timed snapshots of your computer Screen and/or takes snapshots from your connected Webcam.

Ripley, United Kingdom - Arten Science today is pleased to announce that their Macintosh software MonitorMyMac which gives Timed Screenshots and Webcam Images with FTP Upload, is

now available FREE of charge for all parents to help them keep their children safe online by monitoring their computer usage.

MonitorMyMac takes timed snapshots of your computer Screen(s) and / or takes snapshots from your connected Webcam. These images are stored locally or remotely and are also optionally uploaded to your FTP server or MobileMe Account meaning they can they be accessed from anywhere via Webpage Bookmarks.

View your Childs Computer and/or Webcam from Your iPhone, Netbook, Computer or any Web Enabled Device. A Quicktime movie of the captured images can be generated and viewed at a later date, or as a record of events.

- * Activity Log with TimeStamp
- * Can Capture the Dashboard and 'All Spaces'
- * Supplied with an 18 Page Manual in PDF Format

Questions and Answers

Q: How will MonitorMyMac help me Monitor my Childrens Internet Usage?

A: If you install MonitorMyMac on your child's computer they will be less likely to become

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

exposed to the seedier side of the internet as they know you can monitor what they are doing. If you periodically check their screenshots you can be alerted to a potential problem before it occurs.

Being able to see what was on their screen and also what they were doing (via the webcam) gives you the ability to stay aware of what they are doing. Of course, they can quit MMS, but if they do - that's your cue that they may be up to no good. Either way you are informed. Your child's computer usage will not come as a surprise to you.

There are many products that are available to help you protect your children online. MonitorMyMac is not a replacement for them, it is an extra line of defence that may however make all the difference. MonitorMyMac can also be used to provide the evidence that is so often lacking when trying to establish a case against an internet predator.
