

Random Haiku iPhone App Launched by Dynamicore Consulting Inc

Published on 02/12/10

Dynamicore Consulting, Inc has released Random Haiku 1.0 for iPhone and iPod touch. Random

Haiku is a creative experience that engages both the left and right brain sensibilities with five apps in one. A Haiku poetry generator creates random verses of three lines in 5-syllable, 7-syllable, 5-syllable form. The app is also a random number generator and dice roller, random letter generator enabling customers to create their own word-building games, random password generator, and more.

San Francisco, CA - iPhone(R) app Random Haiku was approved by Apple on Monday, February

8th, and launched in the App Store for sale that evening. Random Haiku is a creative experience that engages both the left and right brain sensibilities with five apps in one!

The Haiku title tab is where your poetic skills come to play. A Haiku poetry generator creates random verses of three lines in 5-syllable, 7-syllable, 5-syllable form with the press of a button or a touch and drag on the screen. Vivid seasonal imagery can be generated embodying feelings of tranquility conveying an ultimately positive emotion. Rich, serene words are used to produce each Haiku generated. Producing a sensible, provocative Haiku form takes some creative thinking. Once a great one is produced, simply select by touch then copy the Haiku for pasting into a social network status or anywhere else - email, Notes file, etc.

And four other tabs have packed the app with so much more. The app is also a:

- * Random number generator and dice roller that will throw dice onto your screen with a quick shake and flip.
- * Random letter generator enabling customers to create their own word-building games from a set of randomly generated letters.
- * Random password generator with the ability to generate and store a password between four and twenty five characters in length.
- * Random algebraic speed Or psychic number divination game. Test yourself or compete with friends either mathematically or psychically.

Leveraging iPhone features to add fun, three of the tabs contain sound and visual effects to expand the experience.

Random Haiku Theme: ADAPT

The theme for Random Haiku, and future Dynamicore apps, can be succinctly summed up with DCI's originally coined acronym - ADAPT - App Diversity Accelerates Productive Thinking. DCI's devotion to diverse, productive thinking is reflected wholly in Random Haiku, and other apps are currently being designed with ADAPTability in mind.

"Our goal is to provide apps that are designed to move someone using them from a mathematical to an artistic thought with the speed of a tab touch", said Rob Lind, president and chief architect of Dynamicore. "Why not provide apps that keep the customer's mind busy in a variety of ways? We believe this will lead to greater creative exposure and broader-based entertainment and learning. It is a gift of nature to have multiple talents and interests and our apps will regularly exercise those powers."

Experiences Using Random Haiku

One early customer gave the following feedback: "This is the app that Philip Glass would have built, if he built apps. Strangely compelling. The rub-to-fade and accelerometer add to the legend."

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

DCI's demo audience fully enjoyed the app as well. It was noted that they loved the sound effects and the visuals as well as the natural use of the accelerometer functionality. With the built in drum effects the app customer can jump right in and add a little sound spice to any lively event. But depending on the volume of the party one may need to plug into more robust amplification.

Device Requirements:

- * iPhone and iPod touch
- * Requires iPhone OS 3.1.2 or later
- * 0.8 MB

Pricing and Availability:

Random Haiku 1.0 is only \$0.99 (USD) and available exclusively through the App Store in the Entertainment category.

Dynamicore Consulting, Inc, a software design company based in San Francisco, was incorporated in California in 1990. DCI has been providing superb custom software to businesses around the San Francisco Bay Area since it began those 20 years ago. Prior to that, president and software designer, Rob Lind, had been working in the software business since 1979 after obtaining a bachelors degree in economics and masters degree in business while specializing in information systems. Rob delved into the Apple Mac software development environment when he became involved with multimedia design beginning in the early 90's. With a strong devotion to the arts, Rob has continued to pursue artistic endeavors such as design, photography, and drawing - skills that are indispensable for app development.
