

## **Pavtube Blu-ray Ripper for Mac is updated with subtitle support**

Published on 02/14/10

Pavtube Studio has released Pavtube Blu-ray Ripper for Mac, its new version which is added subtitle support for Blu-ray Ripping. All languages will be listed in subtitle option, which enables users to choose their favorite language for the targeted file. The audio function is improved with more detailed information, including audio streams, including languages, codecs, stream IDs and channels. Some mainstream audio codecs, such as ac3, True HD, etc. are embed in this new version.

Mt Vernon, New York - Pavtube Studio, an excellent and professional software developer, releases its new version Pavtube Blu-ray Ripper for Mac which is added subtitle support for Blu-ray Ripping. All languages will be listed in subtitle option, which enables users to choose their favorite language for the targeted file. Besides, the audio function is improved with more detailed information, including audio streams, including languages, codecs, stream IDs and channels. Some mainstream audio codecs, such as ac3, True HD, etc. are embed in this new version. Even 7.1 channels is available.

The preview function is also enhanced to allow users to adjust subtitle and audio language when previewing. The new-designed profile is more humane, which enables users to customize profile depending on their own need.

This software is an All-in-One tool which integrates Blu-ray Ripper, DVD Ripper and M2TS Converter. Any protected Blu-ray, DVD and M2TS files can be imported and converted to MP4, MOV, MKV, 3GP, AVI, etc for playback on portable and hardware devices and editing on iMovie or FCP/E. Excellent output audio-video sync quality and fast conversion speed are always inherited from Pavtube's glorious tradition.

### **Pricing and Availability:**

Pavtube Blu-ray Ripper for Mac is only for \$49 (USD). Besides, all the updating is free and kind service is always ready at 24/7.
