

iTravelAlert 1.0 for iPhone Keeps Users Safe While Traveling

Published on 02/19/10

E-MAGINE, S.A. today released iTravelAlert 1.0 for iPhone and iPod Touch users who want to remain safe while traveling. The application provides its users with real-time information on travel warnings, including terrorist threats, disease outbreaks and natural disasters. Drawing from sources such as the World Health Organization and the Department of Homeland Security, iTravelAlert data is considered the most reliable possible.

Panama City, Panama - Announcing that E-MAGINE, S.A., the developers of iTravelAlert, has released a brand new app for users who want to remain safe while traveling. The application provides its users with real-time information on travel warnings, including terrorist threats, disease outbreaks and natural disasters. Drawing from sources such as the World Health Organization and the Department of Homeland Security, iTravelAlert data is considered the most reliable possible.

iTravelAlert is brand new and unique. Currently, it is the only application offering complete, real-time news and information for international travel safety and health. For anyone wanting to be able take a trip that's as free of worry and danger as possible, this app is a necessity not only for themselves but also for loved ones who are left behind but want to stay informed.

It's easy to trust the iTravelAlert app. All of its delivered news and data comes from the most knowledgeable and reliable sources available, such as the World Health Organization and the Department of Homeland Security. Users can have the peace of mind that goes along with knowing that they are reading current information from the top-most experts in safe international travel.

Some of the data and alerts covered by iTravelAlert include:

- * Homeland Security News
- * Emergencies and Disasters News
- * H1N1 Pandemic News
- * Disease Outbreak News
- * Avian Influenza News
- * Current Travel Alerts
- * Current Travel Warnings

For anyone who travels, whether for business or pleasure, iTravelAlerts is the ultimate new tool for secure peace of mind during a journey. It covers everything an international traveler and their family might need to know, especially in these times of heightened threats. As the only way that a person can protect themselves is to be informed, this application provides the ultimate information armor it is possible to have.

Device Requirements:

- * iPhone and iPod touch.
- * Requires iPhone OS 3.0 or later
- * 0.1 MB
