

## Houdah Software Announces HoudahSpot 2: Leopard Edition

Published on 11/23/07

Houdah Software is proud to announce the release of HoudahSpot 2: Leopard Edition, their popular search utility for Mac OS X. Version 2 is a complete rewrite for Leopard compatibility, supporting many of its unique features. With HoudahSpot's new all-in-one interface, results are shown next to the search query. Users can issue powerful search queries to the Spotlight engine to zero in on files quickly and easily. This is an all new product and recommended upgrade for all users.

### FOR IMMEDIATE RELEASE

Luxembourg, Europe - November 23, 2007 - Houdah Software is proud to announce the release of HoudahSpot 2.0, their popular file search utility for Mac OS X. Version 2 is a complete rewrite for Leopard compatibility, supporting many of its new features.

Users may create detailed queries to pinpoint the exact file they want to get to. The results may be shown with any number of columns. The list may be sorted by any attribute imaginable. Users may set up templates for frequently performed searches and save queries for direct access to favorite files.

One of HoudahSpot's key features is its extensive customization. Once fully customized, a preferred template may be set as starting point for future queries.

With HoudahSpot's new all-in-one interface, results are shown next to the search query. By taking advantage of Leopard's unique features, users can issue powerful search queries to the Spotlight engine to zero in on files quickly and easily. And with live editing, user may change search criteria on-the-fly without stopping the running query.

HoudahSpot 2: Leopard Edition feature enhancements:

- \* Fully supports Mac OS X 10.5 (Leopard)
- \* New all-in-one interface: results are shown next to the search query
- \* Unlimited customizability of result columns: show and sort by any attribute
- \* Live editing of queries: users may change criteria without stopping the running query
- \* Exclude files by location: alongside a scope for the search users may define a list of places to ignore
- \* Preview files using Leopard's QuickLook
- \* Supports saved searches
- \* Limit output by attribute
- \* Customizable global shortcuts
- \* Drag and drop criteria creation
- \* Unlimited template customization

Minimum Requirements:

- \* Mac OS X Version 10.5 (Leopard) or higher
- \* Universal Binary for PowerPC & Intel
- \* Spotlight enabled
- \* 7 MB Hard Drive space

Houdah Software will showcase its flagship products at Macworld Expo San Francisco. They are giving 100 free expo (Exhibit Hall - no Keynote) passes. Visit our web site to claim your ticket.
