

Camera Dialer released 1.0 for iPhone - Accurately Dial Any Number

Published on 02/20/10

Miami-based GP Imports has released Camera Dialer 1.0, their new point and click photo dialer for iPhone devices. Designed specifically to leverage the iPhone's unique capabilities and touch interface, Camera Dialer takes advantage of the device's camera view to make a phone call - without typing the number. Simply center the phone number in the app's green box that appears in the camera view. Hold still and it will then automatically dial the number without any further user interaction.

Miami, Florida - GP Imports has released Camera Dialer 1.0, their new point and click photo dialer for iPhone devices. Designed specifically to leverage the iPhone's unique capabilities and touch interface, Camera Dialer takes advantage of the device's camera view to dial a phone number, all hands free and without manually typing the number.

Finally, an easy way to make a phone call without actually typing the number. Featuring a comfortable and simple user interface, Camera Dialer offers a multitude of uses, and perfect for anyone on-the-go. Effortlessly direct-dial numbers from any White/Yellow pages, business cards, business signs, flyers, "For Sale", "Real Estate" or even Political signage right from the street. The real-life uses for Camera Dialer are only limited by the user's imagination.

Users simply center the phone number in the application's green box that appears in the camera view. Hold still and Camera Dialer will then automatically dial it without any further user interaction. Camera Dialer is so accurate, users won't believe how useful it is, and works best with white background and black text. In the app's settings, users can modify the normal length of phone numbers as displayed in the green box field, as well as optionally select if calls are to be automated or manually dialed.

Feature Highlights:

- * Comfortable and simple User Interface
- * Accurately dial any number, from anything the camera can view
- * One-Touch Dialing

"We worked really hard to ensure Camera Dialer worked as accurately as advertised," said Paul Jaimovich, CEO and founder of Miami, Florida based GP Imports. "We implemented many in-house routines to make it function accurately across as many conditions imaginable. It's a great gadget for anyone who constantly dials numbers, such as tele-marketers, telethons or just about anything you can imagine. What is nice about the product is that it doesn't require user interaction. Just snap and dial. Simple as that."

Device Requirements:

- * Compatible with iPhone
- * Requires iPhone OS 3.1 or later
- * 3.5 MB

Pricing and Availability:

Camera Dialer 1.0 is only \$0.99 (USD) and available worldwide exclusively through the App Store in the Productivity category. Review copies are available upon request.
