

Typinator 2.1 auto-types text and auto-corrects typos now on Leopard

Published on 11/27/07

Ergonis Software today announced the release of Typinator 2.1, the latest version of its highly acclaimed tool for auto-correcting typos and auto-typing text across all Mac OS X applications. The new version is ready for Mac OS X 10.5 ("Leopard") and improves compatibility with Flash, Numbers, MS Office, Terminal, You-Control, and others. Furthermore, the built-in auto-correction dictionaries have been refined to enhance smooth multi-lingual auto-correction in all applications on Leopard.

FOR IMMEDIATE RELEASE:

Hagenberg, Austria - November 27, 2007 - Ergonis Software today announced the release of Typinator 2.1, the latest version of its highly acclaimed tool for auto-correcting typos and auto-typing text across all Mac OS X applications.

The new version is ready for Mac OS X 10.5 ("Leopard") and improves compatibility with Flash, Numbers, MS Office, Terminal, You-Control, and others. Furthermore, the built-in auto-correction dictionaries have been refined to enhance smooth multi-lingual auto-correction in all applications on Leopard.

Typinator is a powerful, yet elegantly simple solution that works across all applications to detect specific sequences of typed characters and automatically replace them with text snippets, graphics, URLs, dates and special characters.

For business users, Typinator leads to a layer of operational consistency and productivity across heterogeneous applications. A standard customer service response, a signature image on an email, a clause in a contract - each of these can be inserted in any application with just a couple of keystrokes. For technical users, Typinator automates typing of code and the implementation of documentation standards.

Availability and Pricing:

Typinator can be purchased securely on the Ergonis Software website. The upgrade to Typinator 2.1 is free for anyone who purchased Typinator in the last 2 years. For information about purchases, including enterprise licenses, volume discounts, and upgrade pricing offers, visit the website at <http://www.ergonis.com/typinator>.

Instead of purchasing Typinator by itself, customers can get the Macility Productivity Bundle that also contains two of the company's other productivity tools, PopChar X and KeyCue. The pricing of the Productivity Bundle represents a saving of more than 35% over the separate purchase of its components. More information about the Productivity Bundle can be found at <http://www.ergonis.com/productivity>.

Typinator 2.1 requires Mac OS X 10.3.9 or newer. Mac OS X 10.4 or 10.5 is recommended.

Visit Ergonis Software's website to learn more about the changes in the release and to download and try the new version. An Online press kit, including screenshots, is available on the Ergonis Software website as well.
