

## **VolnaTech releases NimbleKit SDK - Software Development for iPhone**

Published on 02/22/10

VolnaTech today released NimbleKit SDK, an update to their software development kit for the iPhone platform. NimbleKit allows to develop iPhone applications much quicker using just HTML and Javascript. You have good ideas for iPhone software but you don't know Objective-C? No need to spend time learning how to use complicated tools, just start development from a template. NimbleKit is well documented and sample code is available.

Kiev, Ukraine - VolnaTech today is pleased to announce NimbleKit SDK, an update to their software development kit for the iPhone platform. NimbleKit SDK allows to develop iPhone applications much quicker using just HTML and Javascript. No need to spend time learning how to use complicated tools, just start development from a template and immediately HTML file available for modification or to launch your app in simulator. Once iPad device is officially released your NimbleKit based iPhone applications can be simply converted to iPad applications or even to Universal binary to run both platforms!

NimbleKit is really easy to use and has many useful features:

- \* Navigation Controllers: upper navigation bar and bottom tabs to allow automatic navigation between your pages
- \* Native fixed position controls like buttons with images, slider, activity indicator, etc
- \* Full control of application appearance including changing main status bar and style of navigation controllers
- \* Playing streamed and bundled audio has never been easier, to play streamed or bundled audio you need just 2 lines of code
- \* Vibration support
- \* Map Kit support
- \* In-App purchases
- \* Address Book support with ability to search for contacts
- \* Access to bundled files so it's possible to read any amount of data for pages from any location in the file
- \* Internet availability to know if we can reach internet via wifi or cellular network
- \* Settings to allow your application save application specific information
- \* Overall stability was greatly improved

What is very important for every application developer is documentation, that's why every function or class in NimbleKit is well documented and for most of them sample code available.

System/Device Requirements:

- \* Mac OS X Version 10.5.5 or higher
- \* iPhone SDK 3.0 or higher

Pricing and Availability:

NimbleKit SDK is available for only \$99.00 (USD). Trial version is full featured but apps created unregistered can run only on iPhone simulator (part of iPhone SDK).
