FOR IMMEDIATE RELEASE

Abneil Software Ltd (graphicxtras.com) release powerful new update of Andrew's Vector Plugins 7 'VectorWand' toolbox plugin set for Adobe (R) Illustrator (R). Update 1.2.5

Update includes two new powerful mesh tools, one for applying color as a brush stroke to a gradient mesh using a variety of different brush shapes, patterns, apply with pressure / pad and many different color settings to create stunning mesh designs; and a mesh tool for transforming mesh points, the mesh can be used to create unique and stunning distortions of images and paths and text as well as abstract designs. Other additions include new scaling features to control the range of scaling of paths; application of point / anchor point manipulation and much more.

Plugin toolkit consists of 19 plugins, simply select the paths and other types of paths in Illustrator and apply the brush shape / pressure to create subtle as well as extreme designs. The toolkit can apply scaling, rotation, translations, stroke width changes, opacity, changes to gradients, changes to patterns, changes to points / direction points, blending modes, tints, swatches, styles and much more. Use the plugin toolkit to add a creative touch to any design.

The set is available via the [graphicxtras](http://graphicxtras.com) site as a download and costs \$15 / 13 euros / 9 GBP. The set is available for Adobe (R) Illustrator (R) CS2 CS 10 MAC OS X.

Set also includes many exciting bonus items, updated documentation and more

A free update is available for previous purchasers of the plugin toolkit.
