

## Cookie Platter Automates Browser Cookie Management

Published on 02/26/10

Arizona based iTacet Software today releases Cookie Platter 1.0, a Mac OS X application which automatically deletes all unwanted cookies and saves specific cookies based upon a user's favorite websites. This innovative software can process cookies for multiple web browsers simultaneously and allows customization by browser, domain and type of cookie. Users can group all domains into their root domain, as well as the ability to preview the cookie's website without opening a browser and more.

Gilbert, Arizona - iTacet Software today is pleased to announce the release of Cookie Platter 1.0, a Mac OS X application designed to solve the ever-growing browser cookie dilemma. It automatically removes unwanted cookies while keeping those from favorite websites and online accounts, maintaining all the website features and recognition.

"Cookie Platter makes management of cookies easy," said iTacet Software President Tim Davis. "From the first launch it immediately flags website cookies the user might want to keep and is ready to remove the rest."

### Feature Highlights:

- \* Processes multiple web browsers (Safari and Firefox) simultaneously
- \* Reads favorite URLs in bookmarks, Address Book, Keychain and Calendar
- \* Allows for custom settings by browser, domain and cookie type
- \* Clears out all unwanted cookies with just a mouse-click

### Specific Features Include:

- \* Groups all domains into their root domain
- \* Allows subdividing root domain into custom domain groups
- \* Processes Flash cookies with browser cookies
- \* Optionally delete cookies by name
- \* Creates backups of browser cookie files prior to deletion
- \* Choice of which web browser to process
- \* Allows override sources for domains of cookies to keep
- \* Preview the cookie's website without opening a browser
- \* View the contents of individual cookies within the application

### Minimum Requirements:

- \* Mac OS X version 10.5 (Snow Leopard compatible)
- \* Intel or PowerPC processor
- \* 1GHz processor
- \* 19 MB Hard Drive space
- \* Safari 4 or Firefox 3.5.

### Pricing and Availability:

A full-feature, 14-day demo of Cookie Platter is available to download at [itacet.com](http://itacet.com). A software license is \$9 (USD).
