With this release, Contactizer 3.5.2 mainly improves its compatibility with the new Apple OS, Leopard. Contactizer 3.5.2 delivers a dozen of issue fixes or enhanced features and is highly recommended for all Contactizer users.

Objective Decision the makers of the contact / project management software Contactizer, today announced the latest release of its software version 3.5.2.

With this release, Contactizer 3.5.2 mainly improves its compatibility with the new Apple OS, Leopard. Contactizer 3.5.2 delivers a dozen of issue fixes or enhanced features and is highly recommended for all Contactizer users.

The biggest new feature of Contactizer 3.5 is the addition of a powerful Project Manager. With 50+ new exciting features and enhancements, Contactizer Pro 3.5 is the most impressive Contactizer version yet. From the introduction of the Data Picker Panel to the capability to manage Projects directly from the Task Manager, Contactizer 3.5 becomes the control center of your daily work.

Contactizer 3.5 is available for free as a download to all Contactizer 3 users. Current Contactizer users will discover an improved overall interface, with the possibility to access tasks from the calendar view or the addition of a Merge Key Panel.

Objective Decision also starts shipping Contactizer Express 3.5. This new application is built on the same core as the Pro version. Contactizer is designed for freelancers, small individual businesses and entrepreneurs that need to access contact information, organize and prioritize tasks, and track all projects and resources.

Contactizer Express or Pro 3.5 can be tested for free by downloading the demo version. Contactizer Pro retails for EUR 99 (USD 119); quantity discounts and educational pricing are available. For more information please contact the Objective Decision sales team.
