

Mireth adds new browsers and Mac OS X Leopard support to NetShred X

Published on 12/01/07

Mireth Technology Corp. has released version 4.1 of NetShred X, its easy to use internet track eraser that erases internet tracks, such as cache, history and email. NetShred X runs on Mac OS X. Version 4.1 adds support for Mac OS X 10.5 (Leopard), support for Safari 3 and support for most other browsers using the custom browser feature. NetShred X version 4.1 is available as a software download or on CD-ROM.

Mireth Technology Corp. has released version 4.1 of NetShred X, its easy to use internet track eraser that erases internet tracks, such as cache, history and email. NetShred X runs on Mac OS X. Version 4.1 adds support for Mac OS X 10.5 (Leopard), support for Safari 3 and support for most other browsers using the custom browser feature.

"NetShred supports all the major browsers and email programs available on the Mac," said Donna Johnson, President. "But with the custom browser feature, the user can configure NetShred to erase tracks for almost any browser or email program on OS X."

NetShred X is easy to use internet track eraser software for Mac OS X that erases files web browsers and email programs leave behind. And like all Mireth Technology products, it was designed to be easy to use. Because internet privacy software can't be effective if it's not used, NetShred X was designed to run automatically, without user intervention.

And since erasing temporary internet files can take some time, NetShred X was designed to run in the background, so using the software doesn't interfere with the user's web browsing. Most importantly, NetShred X is an effective method of permanently deleting internet tracks. This is a cleaner solution than just deleting the files, because it ensures that the data can't be recovered.

This version adds the following features:

- * Support for Mac OS X.5 Leopard
- * Support for more Safari 3
- * Added custom browser feature to add support for almost any browser or email program

Pricing and Availability:

NetShred X is available for immediate download, or on CD-ROM, starting at \$24.95. Registered users can take advantage of special upgrade pricing. Educational pricing and volume discounts are available. NetShred X runs on Mac OS X. NetShred is also available for Mac OS and Mac OS 9.
