

## Daniel Schwill releases version 1.4 of Tables

Published on 11/30/07

Daniel Schwill today announced the release of version 1.4 of Tables. This version offers among other things the following new features: An improved importer for ODF documents, a new importer for AppleWorks documents, merged cells, dynamic sized sheets, protected cells and sheets, colored references in formulas and improved Universal Access support for example for VoiceOver. Tables 1.4 is available as a free update for all registered customers.

Castrop-Rauxel, Germany - November 30, 2007 - Daniel Schwill today announced the release of version 1.4 of Tables. This version offers among other things the following new features: An improved importer for ODF documents, a new importer for AppleWorks documents, merged cells, dynamic sized sheets, protected cells and sheets, colored references in formulas and improved Universal Access support for example for VoiceOver. Tables 1.4 is available as a free update for all registered customers.

Tables enables you to organise and present data very simply. With Tables you can not only organise data but also do calculations and comparisons with it. Add, sum or multiply numbers or process data by using more than 100 functions. Data can not only represent numbers but a date or an amount, too.

Tables offers extensive options to format the data. Format them as currency, as an amount, as percentage rate, scientifically or with different date formats. Create visually attractive invoices, lists or reports and even add some photos, PDF documents or charts to present your data with great visual impact.

Tables 1.4 requires Mac OS X "Tiger" version 10.4 and above and is available for download at [www.x-tables.eu](http://www.x-tables.eu). Tables offers a full functional free 30-day trial. A licence can be purchased from the web-site for 39 EUR (approximately US\$59).
