XChange UK and ThePowerXChange are pleased to announce a new limited time Quite-A-Switch

bundle which includes Enfocus FullSwitch with Quite Hot Imposing and Quite Imposing Plus 2. The bundle offers users unbelievable savings on the powerful products. Not only do they experience the substantial discount with their purchase, but the products let users streamline their workflows and save them even more.

London, United Kingdom - XChange UK and ThePowerXChange, the sources for extended technology worldwide are pleased to announce a new limited time Quite-A-Switch bundle which includes Enfocus FullSwitch with Quite Hot Imposing and Quite Imposing Plus 2. The bundle offers users unbelievable savings on the powerful products. Not only do they experience the substantial discount with their purchase, but the products let users  
S  
off the regular retail price and expires 30th April 2010.

Quite Hot Imposing was designed to be very intuitive and easy to use. The software enables OEMs, system integrators and independent vendors to create customised workflows using either the hot folder or command-line tools within Quite Hot Imposing. Built on the rock solid foundations of the Quite Imposing Plus plug-in and the Adobe(R) Acrobat(R) PDF Library, this incredibly versatile workflow product will not only save all of a user's setups but is also able to repeat all functions as needed. Users can work from a central control window and view the status of jobs at a glance with clear information. They can also customise the window to make their overview even more condensed by turning off unneeded options.

Quite Imposing Plus 2 will impose any PDF file, or PDF files combined from a variety of sources. It's accurate and precise and easy to use even for those with no publishing experience, and is not tied to any PostScript(R) file output requirements. Quite Imposing will also appeal to anyone who's ever wanted to turn a document into a booklet, or shrink slides for a handout. Imposition is totally visual, ensuring no wasted film, plates or time. Quite Imposing Plus offers unprecedented ease of use in an imposition application, by breaking tasks down into separate building blocks which can each be run separately to create new documents on screen. The product also boasts full cross-platform support.

Enfocus FullSwitch is ideally placed to help users reclaim their time to be creative and help their customers. It is a robust automation product that is easy to install and use. Enfocus FullSwitch offers file reception through FTP and email, sorting of files based on file type and naming conventions and automatic email notifications to customers and internal staff.

In addition, FullSwitch introduces configurators that allow third-party applications such as Adobe Acrobat Distiller(R) or Enfocus PitStop Server to be integrated easily in a flow. Setup and automation of those applications is fully controlled from within Enfocus FullSwitch. All this functionality is driven by the visual flow editor and supported by the robust automation tools that are at the core of all Switch products. The visual editor makes it as easy to work with configurators as it is to work with built-in tools. Enfocus FullSwitch also offers professional activity logging and job processing statistics to help you easily locate critical points of the workflow and identify bottlenecks.
