

## **BatchOutput Server for InDesign at 50% off on maczot - Tuesday March 9th**

Published on 03/08/10

Zevrix Solutions offers BatchOutput Server, its output workflow automation solution for InDesign, at 50% off on maczot on Tuesday March 9th. BatchOutput Server offloads printing and exporting to PDF and PostScript to a central system by processing InDesign files from hotfolders. Originally developed for a major magazine publisher in the United States, the software saves companies countless hours that are lost each year because operators have to wait for InDesign to output files.

Toronto (ON), Canada - Zevrix Solutions offers BatchOutput Server, its output workflow automation solution for InDesign, at 50% off on maczot on Tuesday March 9th. Originally developed for a major magazine publisher in the United States to free up their operator computers from outputting InDesign files, the software automates InDesign output by processing files from hotfolders.

BatchOutput Server offloads printing and exporting to PDF and PostScript to a central system leaving operator workstations free from the output process. Under this workflow, production artists and prepress operators simply submit files to hotfolders that reside on the network. BatchOutput Server automatically outputs the files from its dedicated station using hotfolder settings, and will auto-activate document fonts as well. Operator workstations will never again be tied up by the output process.

BatchOutput allows users to output InDesign documents as single pages, update links automatically and compose complex variable file names. As a powerful workgroup solution, the software offers customizable e-mail notifications, detailed logs, automatic error handling and the detailed feedback during processing. Supervisors and operators can monitor all BatchOutput Server activities from their stations using the special Monitor application without the need to walk up to the server station.

### Pricing and Availability:

BatchOutput Server can be purchased from maczot at 50% off for \$349.97 (USD) on Tuesday March 9th only. Trial is also available for download. BatchOutput Server runs on Mac OS X 10.4.2-10.6, a Universal Binary, and works with Adobe InDesign CS-CS4.
