

## Learn to Draw with Mrs. Hoogestraat for OS X Now Available

Published on 12/04/07

Fast Rabbit Software, a software company specializing in downloadable educational software for K through 8 students, has just released Learn to Draw with Mrs. Hoogestraat for Mac OS X. Learn to Draw with Mrs. Hoogestraat aims to help kids enjoy creativity and learning about art through 50 art lessons that include everything from drawing rocket ships to dragons and more. While working through these lessons students will learn concepts like perspective, rendering, and more.

Itasca, IL - December 4, 2007 - Learn to Draw with Mrs. Hoogestraat aims to help kids enjoy creativity and learning about art through 50 art lessons that include everything from drawing rocket ships to dragons and more. While working through these lessons students will learn concepts like perspective, rendering, and more.

Learn to Draw with Mrs. Hoogestraat provides students with the essential building blocks that young artists need. Easy-to-learn tips, tricks, and techniques are included to make the learning process both fun and challenging.

### Pricing and Availability:

Single Computer Registration \$9.95 USD. Registration entitles users to use the full unlocked version of Learn to Draw with Mrs. Hoogestraat v1.x on one computer. Site licenses are great money saving opportunities especially for schools.
