

Intego Releases VirusBarrier X6 Dual Protection

Published on 03/10/10

Austin based Intego today announced VirusBarrier X6 Dual Protection, featuring the latest version of its acclaimed anti-malware and network security software together with BitDefender Antivirus 2010 so Mac users can protect their Windows installations. The latest version of Intego's anti-malware and network security program includes new threat-detection techniques, improved methods of detection, combined detection protocols, proactive behavioral analysis, and a full range of defensive functions.

Austin, Texas - Intego, the Mac security specialist, today announced the release of VirusBarrier X6 Dual Protection, featuring the latest version of its acclaimed anti-malware and network security software together with BitDefender Antivirus 2010 so Mac users can protect their Windows installations. VirusBarrier X6 now provides comprehensive protection from both malware and network threats.

VirusBarrier X6, the latest version of Intego's anti-malware and network security program, includes new threat-detection techniques, improved methods of detection, combined detection protocols, proactive behavioral analysis, and a full range of defensive functions. VirusBarrier X6 includes more than 100 new features, and is the only antivirus program for Mac that includes full antivirus and anti-malware protection together with a two-way firewall, network protection, anti-phishing, anti-spyware features and more.

For Mac users who run Windows on their Mac, using either Apple's Boot Camp or virtualization software, VirusBarrier X6 Dual Protection provides security for both Mac OS X and Windows, ensuring that Mac users running Windows will have total protection for both operating systems. BitDefender Antivirus 2010 provides advanced proactive protection against viruses, spyware, phishing attacks and identity theft, and is the top-rated antivirus for Windows.

System Requirements

VirusBarrier X6:

- * Mac OS X 10.5 or 10.6 (Leopard or Snow Leopard).

BitDefender Antivirus 2010:

- * Mac with Intel processor
- * Apple Boot Camp, Parallels Desktop or VMware Fusion
- * Windows XP SP2, Vista or Windows 7
