Miami based Dynadel today announces Ovulation Calendar 4.0 for iPhone and iPod touch. The Ovulation Calendar application helps you determine your fertile days of the month, so you can either achieve or avoid pregnancy. It also maintains a list of your symptoms during the cycle, your BBT chart and your weight chart among other features. Using the Shettles methods it can help you get pregnant and even estimate the gender of your baby.

Miami, FL - Dynadel today is pleased to announce the release of a new version of the original "Ovulation Calendar" for iPhone and iPod touch. The Ovulation Calendar application helps you determine your fertile days of the month, so you can either achieve or avoid pregnancy. It also maintains a list of your symptoms during the cycle, your BBT chart and your weight chart among other features.

The calendar is based on the date of your periods to predict future ovulation and menstrual cycles. Using the Shettles methods it can help you get pregnant and even estimate the gender of your baby. If you don't want to get pregnant it could also be used to mark the days you should abstain from intercourse to avoid a pregnancy.

Feature Highlights:

- * Password protection
- * Consistency checking
- * Auto filling for missing periods
- * Cervical Fluid tracking
- * Ovulation day computation
- * BBT charting
- * Weight charting
- * Optimized predictions engine
- * Exportable reports
- * Gender prediction

The new version is a total rewrite of the original application. Redesigned to completely accommodate the most requested features from customers all over the world. A lot of new features and improvements are included, a remarkable addition is a new prediction engine, more precise and faster. Also a new consistency checking algorithm will prevent and help you add missing periods from previous months.
