

James Associates releases iHikeGPS 1.1 - Make tracks on the iPhone

Published on 03/16/10

Colorado based James Associates has released iHikeGPS 1.1, its GPS application for iPhone and iPod touch devices. iHikeGPS shows your current location, provides an automatic track with elevation profile, and allows you to set a guiding Go-To waypoint on USA topo maps. Download these maps directly to your iPhone 3G to use in the wilderness where there is no cell service. Email GPX files of your waypoints and your recorded tracks to friends and to yourself directly from your iPhone.

Nederland, Colorado - James Associates has released its iPhone GPS application, iHikeGPS. The software shows your current location, provides an automatic track with elevation profile, and allows you to set a guiding Go-To waypoint on USA topo maps. Download these maps directly to your iPhone 3G to use in the wilderness where there is no cell service.

Email GPX files of your waypoints and your recorded tracks to friends and to yourself directly from your iPhone. Send an email of your current location. Forever-free maps. Whether it's a day hike, geocaching quest, backpacking campout or snowshoe trip - you'll always know where you've been, where you are, and where you're going.

Feature Highlights:

- * Show your current location, an automatic track of where you've been, and waypoints of important places for anywhere in the USA
- * View the elevation profile of your track
- * Email GPX files of your waypoints and your recorded tracks to friends and yourself
- * Zoom and Pan the map with a touch of your fingertips
- * Set a Go To waypoint to guide you

No charges for USA Maps. Ever:

- * Download the forever-free maps directly to your mobile device when you have internet access. Use these maps in the wilderness anytime. Store up to 200 maps on your iPhone or iPad
- * Access both the classic USGS 24K topo maps and updated US Forest Service 24K topo maps
- * Rely on the raster maps from our own server that have been optimized for shortest download time, least memory used, superb resolution, and guaranteed accurate georeferencing

Device Requirements:

- * iPhone and iPod touch (2nd generation)
- * Requires iPhone OS 3.0 or later
- * 0.2 MB

Pricing and Availability:

iHikeGPS 1.1 is currently offered at the introductory price of \$7.99 (USD) and available worldwide exclusively through the App Store in the Navigation category.
