No Games, No Hype, No Middlemen. Just Great software at a Great price. HoudahSpot is Houdah Software's popular file search utility for Mac OS X. HoudahGeo is Houdah Software's one-stop geophoto solution for the Mac. With HoudahSpot, users may create detailed queries to pinpoint the exact file they want to get to. HoudahGeo enables users to geocode and geotag their photos.

Luxembourg - Houdah Software is proud to see both HoudahGeo and HoudahSpot featured at TheMacBundles. Buy 12 Apps for ONLY \$49.99. No Games, No Hype, No Middlemen. Just Great software at a Great price.

HoudahSpot is Houdah Software's popular file search utility for Mac OS X. With HoudahSpot, users may create detailed queries to pinpoint the exact file they want to get to. The results may be shown with any number of columns. The list may be sorted by any attribute imaginable. Users may set up templates for frequently performed searches and save queries for direct access to favorite files.

One of HoudahSpot's key features is its extensive customization. Once fully customized, a preferred template may be set as starting point for future queries. With HoudahSpot's all-in-one interface, results are shown next to the search query. By taking advantage of Leopard's unique features, users can issue powerful search queries to the Spotlight engine to zero in on files quickly and easily. And with live editing, a user may change search criteria on-the-fly without stopping the running query.

HoudahGeo is Houdah Software's one-stop geophoto solution for the Mac. HoudahGeo enables users to geocode and geotag their photos. HoudahGeo integrates with iPhoto, Aperture and Lightroom. It supports JPEG and most RAW formats, as well as XMP sidecars.

HoudahGeo is the ideal companion to the iPhoto '09 Places feature. Upon geotagging photos, HoudahGeo may notify iPhoto'09 about the availability of new metadata. Thus Places is updated immediately to reveal the locations where the photos were shot. HoudahGeo also allows for sharing geocoded photos using Google Earth as well as uploading them to Flickr and iocr.

At the TheMacBundles, HoudahSpot and HoudahGeo are joined by other high quality Mac software:
