

## Exclusive Wireless Networking ExpressCard

Published on 12/06/07

MacBook Pro users can now upgrade to 802.11b/g/n wireless to access virtually any wireless network found while working mobile. New triple antennas are outside of the wireless signal-degrading (but beautiful) 15-inch and 17-inch MacBook Pro case. Combined with the advantage over the stock twin antennas, an improvement in wireless performance is guaranteed. This exclusive wireless upgrade also works with all Apple AirPort Base Stations including the 802.11n AirPort Extreme.

Wichita, Kansas - December 6, 2007 - MacBook Pro users can now upgrade to 802.11b/g/n wireless to access virtually any wireless network found while working mobile. New triple antennas are outside of the wireless signal-degrading (but beautiful) 15-inch and 17-inch MacBook Pro case. Combined with the advantage over the stock twin antennas, an improvement in wireless performance is guaranteed for only \$149.95.

This exclusive wireless upgrade also works with all Apple AirPort Base Stations including the 802.11n AirPort Extreme. Also MacBook Pro users can use almost any wireless network - from coffee shop to library to work and school, and with better than stock performance in range and signal strength. The triple antennas provide the highest speed MIMO specification wireless performance. Virtually any wireless network running 802.11b/g/n equipment on 2.4GHz range is available.

Since this upgrade uses the MacBook Pro ExpressCard slot, users don't have to disassemble the MacBook Pro to get inside to the AirPort card slot. And the ExpressCard slot design also makes it ideal for those users who must have a removeable wireless card - often government agencies and other organizations where security is under tight controls.

The ExpressCard Wireless Upgrade supports all standard security protocols including WPA, WPA2-64bit Personal and 128bit WEP, so you can login anywhere you have password access. It also supports Mac OS 10.4 and Leopard (10.5) including Sleep Mode, so users do not sacrifice functionality to get better performance.

Like most QuickerTek products, the MacBook Wireless ExpressCard is backed with a one-year warranty on parts and labor. Additional product information is found at the QuickerTek website.
