

## 24U Software releases 24U Plug-In Template 3.0

Published on 03/19/10

24U Software has announced an immediate availability of 24U Plug-In Template 3.0, a new version of the free plug-in building template, updated for FileMaker Pro 11. Thanks to intuitive lucidity and efficiency 24U Plug-In Template is appropriate for both beginners and experts. Creating plug-ins with 24U Plug-In Template is nothing more than just configuring few constants in a single header file and writing the desired function code.

Prague, CZ - 24U Software has announced an immediate availability of 24U Plug-In Template 3.0, a new version of the free plug-in building template, updated for FileMaker Pro 11. Thanks to intuitive lucidity and efficiency 24U Plug-In Template is appropriate for both beginners and experts. Creating plug-ins with 24U Plug-In Template is nothing more than just configuring few constants in a single header file and writing the desired function code.

What's new in version 3.0:

- \* Building native plug-ins for FileMaker Pro 11 and FileMaker Server 11
- \* FileMaker Plug-In Support SDK is now included with the template
- \* XCode project adjusted for Mac OS X 10.5 and 10.6 preserving compatibility with 10.4
- \* Added project for Microsoft Visual Studio 2010
- \* Implemented "autoupdate" format for version function
- \* Added "Template Version.fp7" sample database
- \* Documentation is now formatted HTML instead of plain text

Primary Features:

- \* Single point of configuration for both Mac and Windows
- \* Pre-configured version function
- \* Detailed comments in all user-editable files
- \* Easily readable compact code
- \* Ready-to-compile XCode and Visual Studio .NET projects
- \* Pre-configured special targets for debugging
- \* 24U plist compiler for Xcode
- \* Detailed documentation of the template's contents

Use 24U Plug-In Template as a starting point to build better plug-ins more easily. 24U Plug-In Template will let plug-in developers save time, make fewer mistakes, and get much more powerful and elegant results. Make higher quality plug-ins with less effort.

What developers say about 24U Plug-In Template:

"24U FM Template might be useful if you want to reinvent the wheel, but not the axle and the rest of the car." - Jay Gonzales, A.E. Wood & Erickson

"They took the example plug-in project from FileMaker and simplified it a bunch by wrapping it with their own stuff! (BTW - It's FREE!!) It's a whole lot simpler to start with the 24U template than it is with FileMaker's!" - Mike Faulkner, Sky Dancer Studios, Inc.

"A huge thanks for making the plug-in template. From Zero knowledge of CW to producing a filemaker plug-in in less than 1 week. Not bad!" - John Walsh

Software Requirements and Compatibility:

24U Plug-In Template 3.0 requires Mac OS X 10.4 or newer and XCode 2.4 or newer for building plug-ins to run on Mac. Recommended is Mac OS X 10.6 Snow Leopard and XCode 3.2.

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

Windows XP SP3 and MS Visual Studio 2003 are minimum requirements for building plug-ins to run on the Windows platform. Windows 7 and MS Visual Studio 2010 are recommended. 24U Plug-In Template 3.0 can be used to build native plug-ins for FileMaker Pro and FileMaker Server versions 8.5, 9, 10, and 11. Older versions of the template are still available for building plug-ins for FileMaker Pro versions 4 through 10.

**Availability and Pricing:**

24U Plug-In Template 3.0 is immediately available for download free of charge in the form of an open source project.
