

Late Night Cocoa interviews Scott Stevenson about whats new in Cocoa

Published on 12/07/07

Late Night Cocoa (LNC) is a twice monthly podcast intended to help Cocoa developers improve their Cocoa skills and to help experienced developers move to Cocoa. Each episode includes an interview with a top developer who shares his experience and know how, with special emphasis on a specific area or topic useful to Cocoa developers. On this latest episode, Late Night Cocoa host Steve Scott (Scotty) interviews Scott Stevenson from Cocoa Dev Central about what's new in Cocoa.

Tetbury, United Kingdom - December 7, 2007 - Late Night Cocoa (LNC) is a twice monthly podcast, intended to help Cocoa developers improve their Cocoa skills and to help experienced developers move to Cocoa. Each episode includes an interview with a top developer who shares his experience and know how, with special emphasis on a specific area or topic useful to Cocoa developers.

In this episode (24), host Steve Scott (Scotty) interviews Scott Stevenson from Cocoa Dev Central about what's new in the Cocoa frameworks shipped with Leopard. They discuss 64-bit support, new views and view support classes, Core Data, Core Animation, Image Support, Objective-C 2.0 as well as a number of other changes in the Cocoa frameworks.

Late Night Cocoa (LNC) is published by The Mac Developer Network on the 1st and 3rd Thursday of each month. An archive of Episode 24 is available for downloading and listening convenience so users can tune in any time. All episodes can be found on iTunes under the Podcasts/Technology/Software How-To section.

The Mac Developer Network (MDN) is a new website providing developer focused Podcasts, Screencasts articles and tutorials for Mac Developers. The Mac Developer Network (MDN) is hoping to become Mac developers first port of call for all things to do with Mac Development.
