Haymarket, Virginia - Independent entrepreneur Jonathan Conway has released iPoke the Hibernating Bear 1.0 for iPhone and iPod touch. iPoke the Hibernating Bear is a game dedicated to those of us who can't pass up the chance to antagonize, pester, or generally annoy a sleeping animal, no matter the risk of personal bodily injury!

iPoke the Hibernating Bear provides a unique opportunity to get up close and personal with one of nature's most violent and unpredictable animals, but in an arcade interactive and cartoon fashion. Choose from a variety of poke items to prod the hibernating bear from his sleep. Be careful not to be over zealous, as once awoken the bear will almost immediately be on the attack!

Also choose from a variety of teasing items which you can use to annoy the bear, interrupting his hibernation sleep patterns. You can also choose from soothing items to help calm the bear down after you have raised his awareness and anxiety level(s) due to pokes or teases. Tilt the iPhone or iPod touch from side-to-side to avoid the bears deadly strikes, the accelerometer enables this feature.

This game is dedicated to my wife Alma, the fun loving inspiration who enjoys the excitement and challenge of poking at the hibernating bear! Compete with the global gaming community by forwarding screen shots of your highest score to for display on our gaming website.
