Published on 03/22/10

BlackMuse Software has announced Audio Office Notes 1.0 for iPhone and iPod touch devices. With Audio Office Notes, you have the ability to record any meeting and tag the file with timecoded descriptions for easy playback later. Refresh your memory quickly and easily by jumping right to the important parts, without having to listen to the entire meeting. Tag it and hear it again as often as you want with just a touch. Keep track of new ideas brought up so you can implement the details later.

Golden Valley, Minnesota - BlackMuse Software is proud to announce Audio Office Notes - Record and Tag Meetings for iPhone and iPod touch devices. This new app gives the ability to record any meeting and tag the file with timecoded descriptions for easy playback later.

Other recording apps do not have the tagging capabilities of Audio Office Notes. The tags make it extremely simple to jump right to relevant parts of the meeting. Audio Office Notes allows you to record your meetings, and tag and describe important points so you can listen to them again quickly at a later time. Forget certain parts of a meeting? Tag it and hear it again as often as you want with just a touch! Keep track of new ideas brought up so you can implement the details later.

Refresh your memory quickly and easily by jumping right to the important parts, without having to listen to the entire meeting. You save time by not having to ask for information that has already been discussed. This app is truly a must-have for people who have long meetings and may forget certain parts, or if you are responsible for many different tasks that are discussed. Every meeting that goes by unrecorded is another one that may be forgotten. Get Audio Office Notes and increase your productivity today!
