

## **MacService Offers 30% Discount on 250GB Hard Drive Upgrades**

Published on 12/11/07

MacService announced a 30% discount on all 250GB 5400RPM hard drive upgrades for the month of December. You can now get a high capacity hard drive installed for your PowerBook, iBook, MacBook or MacBook Pro at low prices. All prices include free ground roundtrip shipping, installation and a laptop shipping container. Overnight roundtrip service is available.

Santa Clara, California - MacService announced a 30% discount on all 250GB 5400RPM hard drive upgrades for the month of December. You can now get a high capacity hard drive for your PowerBook, iBook, MacBook or MacBook Pro at prices as low as \$206. All prices include free ground roundtrip shipping, installation and a laptop shipping container. Overnight roundtrip service is available for \$79.

How the service works:

MacService sends a custom laptop shipping container to you. Once it arrives, simply pack your laptop and send it back using the prepaid UPS shipping label. Once your laptop is back at MacService, a certified technician installs the new drive and transfers the data over from your old drive. If your old hard drive is failing, a new operating system is installed.

After the service is completed, your laptop is cleaned, tested and sent back to you, along with your old drive. All services are completed within 24 hours of arrival.

Use code SAVE30 on checkout to receive your discount. The promotion ends December 31st, 2007. For more information visit the MacService website, or call 877-622-3473.
