

Easter C@rds 1.9 released - Happy Easter via iPhone

Published on 03/29/10

Hot Chili Apps GmbH today announces Easter C@rds 1.9 for iPhone and iPod touch devices. Easter will be here soon and preparations are hottening up. Easter C@rds are part of the C@rds series created by Hot Chili Apps. Mobile e-card templates for almost any occasion, such as birthdays, Christmas, and many more. Color and size variations of texts and photographs can be altered with just two fingers.

Dusseldorf, Germany - Hot Chili Apps GmbH today is pleased to announce the release of Easter C@rds 1.9 for iPhone and iPod touch devices. Easter will be here soon and preparations are hottening up. Hot Chili Apps is offering an extraordinary kind of digital postcards for those preferring a more relaxed easter break. Easter C@rds are part of the C@rds series created by Hot Chili Apps, mobile e-card templates for almost any occasion - such as birthdays, Christmas, removals and many more.

C@rds is the most sophisticated mobile card app in the App Store. For creating digital postcards the user benefits from iPhone/iPad/iPodTouch's facilities: the template's body and frame can be chosen individually with the Colour Picker. Colour and size variations of texts and photographs can be altered with just two fingers. The final positioning of the elements within the layout is done with a single touch. No need for a brush. C@rds is innovative, trendy and totally unique. Digital postcards can be sent directly from the application to the device's photo album, emailed to family and friends, and even shared on Facebook, Twitter, or tumblr.

"For Easter C@rds we have developed very beautiful designs in different styles.", explains Farid Zendagui, CEO Hot Chili Apps. "The visuals vary tremendously - funny, romantic, serious and much more." Hot Chili Apps offers a wide range of different subjects in attractive easter designs - i.e. the brave little lamb, a puristic egg in Bauhaus style, or even a rabbit shaped body made from delicious, seductive chocolate. A large variety of fonts and colours are available for one's own individual layout. It is quickly and very easily applied: turning and positioning photos or modifying font sizes is done with two fingers only, as in typical iPhone-style. Resulting in an extraordinary easter egg that can be sent immediately from anywhere.
