

Zerion Software and SDG Systems to provide ruggedized Android Solutions

Published on 03/29/10

Zerion Software is collaborating with SDG Systems to provide ruggedized Android solutions to the mobile workforce. Together, the two companies are working to build a field data-collection solution running the offline capable exZact mobile platform on rugged Google Android computers. Both firms see a tremendous opportunity in the marketplace for such a ruggedized solution to be used for Field Service, Task Management, and Work Order Management.

Herndon, Virginia - Zerion Software announced today that they are collaborating with SDG Systems, LLC (SDG), a ruggedized mobile device solutions provider. Together, the two companies are working to build a field data-collection solution running the exZact mobile platform on rugged Google Android computers. Both firms see a tremendous opportunity in the marketplace for such a ruggedized solution. Armed with this rugged and next-generation solution, Zerion is in the process of exploring a number of promising opportunities in different vertical markets, including defense, energy, research (R&D), and utilities.

At a glance, Zerion Software's exZact mobile platform features include: Custom form creation with basic and advanced widgets with smart control, centralized form management, 'over the air' form distribution, 'In and out of coverage' data collection, onsite data capture, validation, data transfer capability, on demand report printing, and data sharing | viewing with other applications in multiple formats, including Excel, HTML, PDF, List, Map, XML, JSON, RSS, and ATOM.

Zerion Software's ambitions for 2010 are to add more workflow into the core product, allowing penetration into Field Services, Task Management, and Work Order Management.

SDG Systems is a value-added reseller of ruggedized mobile computers, enterprise cameras and related hardware, providing industry-leading solutions for Linux and Windows Mobile. SDG Systems provides a wide range of products and services to meet the needs of the mobile workforce, including support, custom development, device drivers, and specialized Linux ports to new devices. SDG specializes in Linux-based solutions and has implemented Android on the Trimble Nomad and Pidion BIP-6000.

"SDG Systems is excited to collaborate with Zerion Software in offering this complete ruggedized mobile solution. Many field workers operate in less-than-ideal conditions. SDG's rugged, Android hardware and Zerion's flexible software seamlessly fuse together to provide a valuable end-to-end mobile solution. SDG enables Zerion to offer solutions to clients with extreme environmental requirements." - Todd Blumer - SDG Systems

"The cooperation between our firms is a logical step in the evolution of our product reaching beyond our current client base, and into a new segment of the marketplace, where we believe our combined expertise will yield new and exciting opportunities, benefiting both our firms." - Sze Wong - Zerion Software, Inc.

Zerion Software has an aggressive strategy in the mobile development space, from Product Development to Consulting Services.
