

PhatWare Launches WritePad for iPad

Published on 04/03/10

California based PhatWare Corporation today announces WritePad v3.2, the advanced handwriting recognition software now optimized for iPad. WritePad lets users take notes in their own handwriting with an iPad stylus pen or a finger. The state-of-the-art handwriting recognition software will adapt and learn while it is being used, improving the recognition quality overtime. WritePad supports simple gestures to select text, cut, copy, paste, and insert special characters.

Palo Alto, CA - PhatWare Corporation announces today the immediate availability of WritePad for iPad, the advanced handwriting recognition software now optimized for iPad. WritePad for iPad is one of the first applications to be available in the iPad App Store from day one.

WritePad lets users take notes in their own handwriting with an iPad stylus pen or a finger. The state-of-the-art handwriting recognition software will adapt and learn while it is being used, improving the recognition quality overtime. WritePad supports simple gestures to select text, cut, copy, paste, and insert special characters.

"For many years our handwriting recognition software was available on numerous mobile devices including iPhone and others, but only now we have found the perfect hardware match - Apple iPad." - said Stanislav Miasnikov, president of PhatWare Corp. - "Today am pleased to announce WritePad for iPad - the world's most advanced handwriting recognition software designed for iPad."

WritePad has a spell checker with it's own custom dictionary, a context analyzer which allows users to dial phone numbers or open URLs embedded in the text, auto-corrector which automatically fixes common spelling and recognition errors, and a Shorthand feature that lets users perform editing commands, insert current date, time and any repetitive text by writing a short name and drawing a circle around it.

WritePad also allows users to exchange documents over Wi-Fi between two or more iPad or iPhone devices and to download files onto the desktop computer using the Internet browser. Interface to the Bing Translator, lets users translate WritePad documents to 13 supported languages.

Device Requirements:

- * Compatible with iPad
- * Requires iPhone OS 3.2 or later
- * 1.9 MB

Pricing and Availability:

WritePad for iPad v3.2 is only \$9.99 USD (or equivalent amount in other currencies) and available worldwide exclusively through the App Store in the Productivity category.
