Faces iMake is the next generation of art apps that are fun for the entire family. A must-have for any parent or child, anyone can use it to create unique, digital art that can be emailed, facebooked/twittered and saved as a contact photo. iImagine machine is at the forefront of iPhone apps that are educational and addictive.

Missoula, Montana - iImagine machine, a newcomer and pioneer in iPhone app development, today is pleased to announce the release of Faces iMake 1.1, the iPhone app that is empowering users to create unbelievable art from over 100 everyday objects.

Developed in conjunction with world renowned mixed-media artist Hanoch Piven, Faces iMake is the next generation of art apps that are fun for the entire family. A must-have for any parent or child, anyone can use it to create unique, digital art that can be emailed, facebooked/twittered and saved as a contact photo. iImagine machine is at the forefront of iPhone apps that are educational and addictive.

"My art is about inspiring people to look at the world around them in a different way. Creating with everyday-objects is a new form of 'drawing' which is easily accessible. There is no technique barrier! Anybody can. Everybody is empowered by the experience! This App makes you feel that ART is PLAY, and that is exactly what great artists feel!" says Piven from L.A.'s Skirball Museum, one of the stops on his critically acclaimed and sold out Children's Art Workshop world tour.

Piven's distinctive collage caricatures have appeared on the pages Time, Newsweek, The New Yorker, Rolling Stone, The Times (London), and The Guardian. His work is in the permanent collection of the Library of Congress in Washington, DC. A recipient of the NY Society of Illustrators Gold Medal in 1994, Piven has published many children books in the United States.

"For us, the ability to develop apps for young minds, thirsty for creative outlets, makes us think like children -that everything is possible and creativity through art is exactly that," says founder Eyal Dessou-Tzafrir from his offices in Manhattan.
