Productive Computing, Inc. Releases iCal Manipulator

Published on 04/10/10

California based Productive Computing, Inc. has announced the release of iCal Manipulator. This new plug-in provides a bi-directional data exchange between FileMaker Pro and Apple's iCal application. No XML programming required. All integration is performed with FileMaker script steps and calculations. Create, retrieve, edit or delete iCal calendars, events and tasks directly from your FileMaker database, eliminating double entry.

San Diego, CA - Productive Computing, Inc., a Platinum member of the FileMaker Business Alliance, announces the release of iCal Manipulator. This new plug-in provides a bi-directional data exchange between FileMaker Pro and Apple's iCal application.

iCal Manipulator Key Features:
* No XML programming required. All integration is performed with FileMaker script steps and calculations
* Create, retrieve, edit or delete iCal calendars, events and tasks directly from your FileMaker database, eliminating double entry
* Push your FileMaker tasks and events to iCal to take advantage of the iCal pop-up event and task alarms
* Supports creating, editing, and deleting recurring events in iCal
* Provides a conduit to access your FileMaker Pro data on your mobile device
