

Singular Software Announces Public Beta for Next Release of PluralEyes

Published on 04/11/10

Singular Software is pleased to announce the public beta PluralEyes version 1.2 for Apple Final Cut Pro(R). Designed for time-conscious video professionals, PluralEyes offers critical workflow automation tools for synchronizing audio and video clips, including DSLR camera video. The public beta carries the first round of a series of imminent product enhancements leading up to the full version announcement next month.

Vancouver, British Columbia - Singular Software, developer of automation applications for post-production, is pleased to announce the public beta PluralEyes version 1.2 for Apple Final Cut Pro(R). Designed for time-conscious video professionals, PluralEyes offers critical workflow automation tools for synchronizing audio and video clips, including DSLR camera video. The public beta carries the first round of a series of imminent product enhancements leading up to the full version announcement next month.

The new version will include improved workflow for dual-system audio, clock drift correction, increased synchronization control, broader coverage of media types and customer-requested enhancements. It does not overwrite the previously installed PluralEyes 1.1, and can run alongside that version. To download the PluralEyes 1.2 for Final Cut Pro public beta, please visit the direct download link.

About PluralEyes:

The PluralEyes application dramatically accelerates the workflow for multi-camera, multi-take and dual-system audio productions. By analyzing audio information, PluralEyes synchronizes audio and video clips automatically, without the need for timecode, clappers or other manual preparation. Optimized for fast performance on both Mac and PC platforms, PluralEyes supports both Vegas Pro(R) and Final Cut Pro.

Availability and Pricing of PluralEyes:

PluralEyes for Final Cut Pro is available to purchase for \$149 USD via the Singular Software website. Final Cut Pro users can also sample PluralEyes by downloading a fully functional 30-day free trial version from the link provided.
