

iMagePhone Pro 1.3 adds iCal calendar events and improves text support

Published on 04/14/10

Polo Planet Software today releases iMagePhone 1.3 Pro, an update of their iPhone and iPod touch wallpaper maker for Mac OS X. Users can easily crop and resize backgrounds, add custom text or iCal calendar events to wallpapers as well as preview, organize or upload wallpapers to iPhone. Apple iPhoto integration and over 50 photo effects help to customize iPhone's background. Prepared backgrounds may be organized in wallpaper gallery for further editing or immediately uploading to iPhone.

Kyiv, the Ukraine - Polo Planet Software today is pleased to announce the release of iMagePhone 1.3 Pro - an update of their iPhone and iPod touch wallpaper maker for Mac OS X, that adds iCal integration, improves text appearance on iPhone backgrounds and brings other changes. Calendar control allows to pick day, week or month events for selected date and specific calendar. Event details displayed in convenient and flexible list view.

Essential parameters, such as font size, alignment may be applied for both text and iCal events. Other changes address stability and user interface improvements. Device preview now also available on main window and instantly display new iPhone look in different modes, and pixelated image warning prevents resulting wallpaper quality loss.

iMagePhone Pro also includes iPhoto integration and allows automatic creation of backgrounds from any iPhoto library. This makes iMagePhone a perfect compliment to Apple's iLife Suite. Thanks to iMagePhone iCal integration, you may add birthday calendars, task scheduling and other calendar events to iPhone's lock screen in simple and elegant way. Wallpapers may be emailed to family and friends, saved and organized into Gallery Folders or uploaded directly to iPhone.

iMagePhone is available as both a Free, and Pro Edition. iMagePhone Pro Edition offers more advanced editing tools, over 50 Core Image and Quartz based photo effects, as well as supports batch resize and uploading in batch mode.

iMagePhone Pro 1.3 changes:

- * Add iCal calendar events feature
- * Device preview for application window is now available
- * Display of contextual Pixelated Image warning in editor
- * Text background was changed to gradient
- * Prevent to import duplicate original system wallpapers
- * Minor memory leak while image editing is being fixed
