

1Password 2.5.8 Introduces Firefox 3 Support

Published on 12/21/07

Agile Web Solutions, Inc., today announced that 1Password version 2.5.8 now integrates directly into the newly released Firefox 3, beta 2. Firefox 3 users can now save their web form data directly in the browser, as well as fill out credit card information with a single click. This update is free to all 1Password customers.

FOR IMMEDIATE RELEASE

Toronto (Ontario, Canada) - Agile Web Solutions, Inc., today announced that 1Password version 2.5.8 now integrates directly into the newly released Firefox 3, beta 2. Firefox 3 users can now save their web form data directly in the browser, as well as fill out credit card information with a single click. This update is free to all 1Password customers.

What is 1Password?

- * The most widely used password manager for Mac OS X (according to MacUpdate, VersionTracker and iusethis).
- * A Macworld magazine "Mac Gem" rated 4.5 out of 5 in August, 2007, and nominated for a Macworld Readers' Choice Award.
- * The only password manager with integrated anti-phishing technology.
- * An automatic form filler with support for credit cards and multiple identities.
- * A highly secure database to keep track of web site logins, secure notes, identities, credit cards, bank accounts, and software registration information.

What is new in Version 2.5.8?

- * Firefox 3 beta support. 1Password 2.5.8 now fully supports the recently announced Firefox 3 beta.
- * Improved filling of identity and web forms. An improved identity and wallet automated form filler adds support for websites designed with HTML 4.0-compliant label tags. Additional improvements have been made for better performance on German web sites and the Apple Store.
- * Extended password generator. A new password generator sports a simplified user interface as well as a new feature which allows users to specify if character duplication in a password is permitted.
