

New KidKeys App for iPad Makes Typing Easy for Little Fingers

Published on 04/23/10

Virginia based BV Software LLC today announces KidKeys 1.0 for iPad. KidKeys is a colorful custom keyboard that connects with your computer and makes it easy for kids to type. KidKeys can be used with any word processing program or for e-mails to Grandma or inside your child's favorite games. Little hands will appreciate its big, bright buttons. All the confusing keyboard functions have been stripped out, leaving only the basics to make typing simple for children learning how to read.

Richmond, Virginia - BV Software LLC today is pleased to announce its KidKeys App for iPad is now available on the App Store. KidKeys is a colorful custom keyboard on your iPad that connects with your computer and makes it easy for kids to type. KidKeys can be used with any word processing program like Word or Notepad or for e-mails to Grandma or inside your c
confusing keyboard functions have been stripped out, leaving only the basics to make typing simple for children learning how to read.

a

The KidKeys interface supports upper and lower case letters, numbers 0-9, simple punctuation marks including periods, commas, question marks and exclamation marks, a space bar, return tab and delete key. After downloading the required free server software, the iPad can simply be placed next to your computer and KidKeys will work wirelessly. Kids can type letters, words and sentences on your iPad and they will appear seamlessly on the computer screen.

If you'd like to create your own custom keyboards, keep an eye out for the upcoming CustomKeys App. CustomKeys will be available soon and you can start creating your own keyboards today at customkeysapp.com.
