

XChange International announce release of GeometryReporter for InDesign

Published on 01/11/08

XChange International, the source for extended technology worldwide, are pleased to announce the release and availability of the GeometryReporter plug-in for Adobe InDesign CS, CS2 or CS3. The plug-in generates and displays measurements for any box within an InDesign document, including text, picture and unassigned "none" boxes.

XChange International, the source for extended technology worldwide, are pleased to announce the release and availability of the GeometryReporter plug-in for Adobe InDesign CS, CS2 or CS3. The plug-in generates and displays measurements for any box within an InDesign document, including text, picture and unassigned "none" boxes.

GeometryReporter is capable of generating the following measurements (each on their own layer):

- Intra-box measurements, which are measurements of a box from edge to edge.
- Extra-box measurements, which are measurements from box to page edge.
- Inter-box gaps, which are measurements between separate boxes.

Measurements are generated according to what the "Units & Increments" Preferences of the InDesign document are set to. If the document is set up in picas, then the plug-in will generate measurements in picas or if the document is set up using inches, the plug-in will generate measurements in inches, etc. The plug-in is also capable of generating labels for the Images placed in the document.

System Requirements:

Macintosh and Windows platforms for Adobe InDesign CS through CS3.

GeometryReporter is available now through XChange International. To order, or for more information, users can visit the XChange website, or call on +44(0)20 7490 4455 during UK business hours.

XChange Website:

<http://www.xchangeuk.com>

XChange are a leading supplier of desktop graphic and publishing applications, QuarkXTension(R) technology; Adobe InDesign(R), Acrobat(R) and Photoshop(R) Plug-ins(R) and other design and publishing utilities.
