

Mac Shutdown X 1.0.3 available

Published on 02/24/07

Mac Shutdown X lets users shutdown a unattended Mac at the end of a Safari download, and more...

FOR IMMEDIATE RELEASE

Mac Shutdown X is a utility designed for Mac OS X to shutdown the Mac on a specified event (as an example when a file download, using Safari, is finished) or on a specified date and time.

It is customizable using a easy to use setting setup panel (no coding required) using also the new controls elements available under Mac OS X 10.4 (Tiger) and successive.

Mac Shutdown X is a universal binary application native both on PPC Mac and Intel mac.
