

Critical Matter Releases Color Picker Pro 3.1 for OS X

Published on 01/10/08

Critical Matter, Inc. is proud to announce the release of Color Picker Pro 3.1, their professional level color picking utility for Mac OS X. Color Picker Pro is a small drag and drop savvy application that aids in finding Hex, RGB and HSL color values for use in CSS and HTML production. With the ability to float above other applications and capture colors, even when in the background, Color Picker Pro integrates almost seamlessly into any design workflow.

FOR IMMEDIATE RELEASE

Salt Lake City, Utah - January 10, 2008 - Critical Matter, Inc. is proud to announce the release of Color Picker Pro 3.1, an update to their professional level color picking utility for Mac OS X. Color Picker Pro is a small drag and drop savvy application that aids in finding Hex, RGB and HSL color values for use in CSS and HTML production.

With the ability to float above other applications and capture colors, even when in the background, Color Picker Pro integrates almost seamlessly into any design workflow. Quickly and easily pull colors out of application windows, icons, the Desktop or anything else on the display. Users may then copy or Drag and Drop color values to their favorite text based CSS or HTML editing application.

A particularly useful feature that sets apart Color Picker Pro is its ability for users to tailor the format of Hex, RGB or HSL color values to personal specifications. Store frequently used colors, undo and redo color changes or make colors web-safe at the press of a button.

Version 3.1 introduces the ability for users to alter their capture point 1 pixel at a time by utilizing arrow keys. The capture point can also be altered in 10 pixel increments by holding down the shift and arrow keys simultaneously. Color Picker Pro 3.1 is a free upgrade for all registered users and is a recommended upgrade for all customers.

Color Picker Pro Features:

- * Live Magnification lets users capture any pixel on their display.
- * Copy or Drag and Drop color values to your favorite editor.
- * Format Hex, RGB and HSL color values to personal specifications.
- * Store frequently used colors.

Color Picker Pro 3.1 Changes:

- * Enhancement: Alter pixel capture point 1 pixel at a time by utilizing the arrow keys.
- * Enhancement: Alter pixel capture point in 10 pixel increments with shift and arrow key combo.

Minimum Requirements:

- * Mac OS X Version 10.4 Tiger or higher
- * Universal Binary for PowerPC and Intel
- * 3.3 MB Hard Drive space

Pricing and Availability:

A full-featured 30 day demo version is available for download from the Critical Matter website. Single seat licenses are priced at \$17.95 USD.
